SLEEPTRAINERS

Teach children
when to stay in bed and
when it's OK to get up

Davy the dog

Teaches children when to stay in bed
and when it's OK to get up

Davy the dog

SLEEPTRAINER

WITH NIGHTLIGHT

A compact sleeptrainer, clock and nightlight, that teaches children when to stay in bed and when it is OK to get up.

Eyes open and close

Davy's eyes automatically close at bedtime and open in the morning when it is ok to get up. Set at a specific time or by length of nap.

Colour changing display

The LCD screen changes colour to denote morning or night, 12 stars disappear 1 by 1 counting down the remaining bedtime.

Analogue and digital time

Easy for children to learn and understand time.

Alarm clock

For older children set a separate sound alarm. Choose from 3 sounds with adjustable volume.

Adjustable brightness and auto shut-off

Dimmable nightlight can stay lit continuously or automatically switch off after 5, 15, 30 or 60 minutes.

Time to sleep

Just a little longer

OK to get up

PROJECTORS

*Transform your
little one's room into
a magical scene*

Cody the crab

*Life like underwater world
with swimming fish*

Life like underwater world
with swimming fish

Cody and Otto

OCEAN PROJECTOR

WITH MOVING WAVES AND MELODIES

Turn your little one's room into a magical underwater world, with moving waves and fish swimming around the room, while listening to relaxing ocean sounds.

3 Step sleep program

Helps your little one to fall asleep by lowering the animation in 3 steps. The projector will automatically shut off after 30 minutes.

3 Soothing melodies

Play soothing melodies while falling asleep: ocean, heartbeat or lullabies.

Cry sensor

The projector can automatically activate the last used settings when your baby starts crying.

Recommended by sleep experts

STEP 1

STEP 1 Calming your child (0-10 min.)

- Moving waves
- Lots of swimming fish
- Soothing ocean sounds

STEP 2

STEP 2 Getting sleepy (10-20 min.)

- Moving waves and a few fish
- Lower brightness
- Relaxing underwater bubbles

STEP 3

STEP 3 Falling asleep (20-30 min.)

- Non-moving waves
- Lowest brightness
- No sound
